

Galapagos is a drug discovery company with pre-clinical programs in bone and joint diseases and bone metastasis. Our service division BioFocus DPI offers a full suite of target-to-drug discovery products and services, ranging from target discovery and assay development to medicinal chemistry and predictive drug discovery. The company has established collaborations in drug discovery with most major pharma and biotech companies. Our research activities in five European countries and the US are successful thanks to our highly motivated staff of more than 450 employees, a unique technology base and a strong financial position.

For our site in Saffron Walden, near Cambridge, UK, we are looking for a

Computational Chemist

CRP-231

Description

You will be applying computational methods to the discovery, optimization and development of drug candidates. You should be capable of working within multidisciplinary teams and impacting projects with innovative problem solving.

You will have extensive experience in computational chemistry/biology with a successful track record in the pharmaceutical or related industry. You will also have a broad range of expertise in structure and ligand-based drug discovery, pharmacophore modelling, empirical and quantum mechanical methods, data analysis, virtual screening and *in silico* ADMET prediction. A strong understanding of medicinal chemistry and structural biology is preferred. Familiarity with software such as Moe, Cresset, Discovery Studio, Pipeline Pilot and the Schrodinger suite would be an advantage along with experience in computational biology and its application in the design of therapeutics.

Excellent interpersonal and communication skills are essential. You must be eligible to work for any company in the UK.

At Galapagos and BioFocus DPI we aim to recruit the best people, who stand out among their peers, with integrity and excellent interpersonal and organizational skills. Our employees are the strength behind Galapagos, a highly motivated team, eager to maintain Galapagos' leading position and achieve breakthroughs in pharmaceutical research. Galapagos offers a competitive remuneration package and a dynamic work environment.

Do you have the qualifications for this job opening and are up to the challenge of joining our entrepreneurial team? If so, please send your application (preferably by e-mail) to:
